

Student Leave Guidelines

DRAFT / STUDENT-PROVIDED DATA — NOT AN OFFICIAL UNIVERSITY POLICY

Prepared for the Knowledge Base from the student's description of the leave process followed at the university. The details below should be verified against the current official university rules before being used as authoritative guidance.

1. Applying for Leave

Students are required to apply for leave through **Chalkpad**. The leave application should be submitted through the designated leave facility available to students on the platform. Students should ensure that the application contains the required information and is submitted for consideration by the concerned authority.

2. Leave Approval and Mentor

The **mentor** is the primary person to contact regarding the leave process. Students should communicate with their mentor when they need clarification about leave, approval, or any issue related to their absence.

Important: No fixed advance-notice period was specified in the information provided. Therefore, this document does not state a specific number of days that students must apply in advance.

3. Medical Leave

For medical leave of **3 days or more**, medical documentation is required. Students should obtain the required official medical document and follow the applicable submission/approval process.

According to the student-provided process, the official medical document is obtained from the **tuck shop** and must be **signed by the student's parents**. Students should retain the document and provide it as required for the leave/attendance process.

4. Medical Leave and Attendance

The student-provided information states that, for medical leave to be considered/calculated in attendance, the student's attendance should fall within the **65%–75%** range.

Example: If a student's attendance is within the stated 65%–75% range and the student has the required medical documentation, the medical-leave attendance process may apply according to the university's procedure.

5. Leave During Assessments / STs

The information provided states that when leave results in a student needing a reappear, the student has to **give the reappear examination by paying the applicable fee** and also complete the required **makeup STs**.

The exact circumstances in which a leave results in a reappear or makeup ST were not specified in the information provided, so no additional conditions have been added to this draft.

6. Hostel Students Going Home

Hostel students who are going home are required to use **U-Hostel** and apply for the required **pass** through the hostel process.

Students should complete the pass procedure before leaving the hostel and follow the instructions shown in U-Hostel for their particular leave/out-pass request.

7. Who to Contact

For questions, clarification, approval-related issues, or other leave-related concerns, students should contact their **mentor**.

8. Information Not Yet Specified

The student-provided information does not specify a maximum number of leave days, a separate emergency-leave procedure, the exact approval hierarchy beyond the mentor, or the detailed conditions for reappear/makeup STs. These points should be obtained from an official/current university source rather than assumed.

Knowledge Base note: This is a student-provided draft intended for collection and development. It should remain marked **needs-currentness-verification** until an official university source is identified.
